## FURNITURE INTRODUCTION

Our seagrass furniture collection features a range of sofas, dining sets, and beds suitable for indoor use. All our furniture is handmade by skilled craftspeople using traditional wicker weaving techniques which gives a unique character to each design and a personal touch to any living space.

## ABOUT US

Our company is made up of a fusion of cultures and skills. Our enthusiastic designers live, breathe and dream of natural furniture with a boho aesthetic.

As well as creating their own inspired designs, our designers can give you expert advice not only on your custom rattan furniture design concept but also on the practicalities and feasibility of manufacture. Their imagination coupled with in-depth knowledge and experience of the handicraft industry means we'll provide ideas and design concepts to put you ahead of your retail competition.

Our English speaking sales staff is well trained to provide support to our global clientele. They will keep you advised of the progress of your order and help with shipping arrangements as they are knowledgeable about exporting procedures.

# SEAGRASS FURNITURE

Seagrass is a plant that grows in shallow waters near coastlands. When it dries after being woven, it attains a brown, hard finish that is very similar in appearance to synthetic rattan.

The durability of the reed, the hay-like smell of the dried seagrass and the multitude of finishes that it is available in, make it a fantastic material for weaving chairs and sofas.

Hand woven furniture has its own unique traits and is crafted with attention to detail. If you buy a set of four chairs none of them will be similar. There will always be minute differences which make them unique.
